

Introducing the new **Paragon P5**

Charlton & Jenrick^{LTD}
Best of British fires, fireplaces & stoves

Fits most chimneys

Paragon P5

The new addition to the P Series gas fire range has striking visual impact combined with excellent efficiency

The **Paragon P5** is the latest addition to the already established *P series* range of gas fires. This is the first product to adopt the latest advanced Core flat burner technology along with ultra-high definition log shapes and a glowing ember fuel bed.

The P5 firebox size allows installation into a large majority of chimney breasts without the need for any additional building work. The size is also perfectly proportioned to fit with the popular 54" fireplace designs that are available from all fireplace retailers.

The **Paragon P5** is controlled by the latest in user-friendly bluetooth technology via a remote-control handset. This will allow full operation of the fire from the comfort of your chair.

The **Paragon P5** performance is equal to anything within its class. Producing a very impressive 5.4kW output with an efficiency of 83.4% for economical burning.

Features

- Anti-reflective glass as standard. This reduces the majority of reflections and gives the fire an 'open' effect
- Choose from ceramic black ribbed or black mirror glass firebox panel
- High definition fresh cut finish log fuel bed
- Bluetooth remote control system – On/off, pilot standby and variable rate between high and low rate
- 9v safe plug in transformer mains power.
